- HTML
- CSS
- JavaScript

Frameworks & Libraries

- React (learning and actively applying)

Backend & Development Tools

- Node.js (learning)
- Git
- GitHub

Design & Workflow

- Figma
- Responsive Design
- UI Development
- Component-Based Thinking

- Version Control
- Deployment Workflows

PROJECTS

Nyota Meats — Business Website Concept

Designed and developed a premium responsive website concept for a meat supply business with a strong focus on visual hierarchy, trust-building sections, business communication, FAQ systems, and modern user experience principles.

SPA Portfolio Site — Single Page Application

Built a responsive personal web application focused on presenting projects and professional identity through structured layout, smooth navigation, and interactive frontend experiences.

Pala Lume — Salon Website

Designed and developed a modern salon website concept emphasizing premium branding, service presentation, responsiveness, and conversion-focused user flows.

Developer Portfolio Website

Designed and built a personal portfolio website to showcase technical projects, communicate capabilities, and create a foundation for professional opportunities and future service offerings.

EDUCATION

Degree: Bachelor of Science in Software Engineering.

Institution: Kisii University — Faculty of Information Science and Technology.

Expected Graduation: 2029

CURRENT DEVELOPMENT FOCUS

Deepening JavaScript fundamentals through project-based learning.

Building with React and modern frontend workflows.

Learning backend development with Node.js.

Exploring full-stack application architecture.

Developing production-quality portfolio and business websites.
